R:W

At its regular meeting on July 7, 2005, the UAF Master Planning Committee unanimously approved the following recommendation (MPC 05-05) regarding West Ridge parking. This recommendation is based upon a May 4, 2005 report (see attached) to the MPC prepared by its Circulation and Parking Subcommittee (C&P). A quorum was established; 6 MPC members were present.

The recommendation reads:

- 1) West Ridge parking plans should immediately target an average utilization of 80%, as there is inadequate capacity of peak hours. This means that there is an immediate need for construction of a minimum of 29 additional powered parking spaces.
- 2) Electrical service shall be provided to all permanent parking spaces. Existing temporary parking spaces shall be upgraded, either in-site or through relocation, to permanent status.
